

LEATHER STANDARD by OEKO-TEX®

OEKO-TEX® Website as Showcase for Certified Companies

The LEATHER STANDARD by OEKO-TEX® made its debut at the beginning of January 2017. Worldwide some 40 companies belonging to the leather and footwear sector have meanwhile embraced this initiative and offer OEKO-TEX® assurance for a wide range of leather articles. The OEKO-TEX® website offers certified companies an opportunity for free-of-charge multilingual presentation of their company profile in order to show their colours in this central directory and to enable potential customers and consumers to find them.

OEKO-TEX® certified companies and brands are listed together with their articles under «Certified Products» at www.oeko-tex.com. Appropriately certified companies are now also listed under the heading «LEATHER STANDARD by OEKO-TEX®».

This reference tool on the OEKO-TEX® website can also serve as a buyer's guide because it permits all interested parties to contact OEKO-TEX® certified companies directly. Various filtering options facilitate targeted searches according to country and product class – from baby articles to decoration materials. Access to certain suppliers among the thousands of certificates in the case of STANDARD 100 alone is thus focussed and simplified. Moreover, manufacturers of technical textiles, precursors, auxiliaries, equipment, and chemicals can also be found.

Any OEKO-TEX® certified company can place their multilingual company profile free of charge on www.oeko-tex.com and thus address specific markets and individual customers. A link to the company's own website is also possible.
